FOREWORD

The *Mississippi Statistical Abstract, 1979,* is the eleventh annual edition which has been published by the Division of Business Research, Mississippi State University. Ron Moore, who has completed all requirements for the doctorate, except the dissertation, served again this year as Assistant Editor. He compiled and edited the data for this edition, as well as for the 1977 and 1978 editions. Special acknowledgement is made to him again this year for the excellent manner in which he handled the 1979 edition. Upon his departure in August, 1979, for a new post where he will continue to work on his dissertation, the Division welcomes Brenda P. Harman, a Doctoral Candidate who is also at the dissertation stage, who will serve as Assistant Editor of the 1980 edition.

Special acknowledgement is made also to Peggy Zimmerman who coordinated efforts of the proofing team, prepared materials for publication and served as liaison between the Division of Business Research and Reinbold Lithographers, Inc.

Finally, I must thank especially, also, Carol Ward Winstead and Dale Adams who rendered assistance in numerous ways throughout the entire project.

The eleventh edition contains the same sixteen sections found in previous editions, but efforts continued this year to improve the quality of its contents. Additional figures were included; a list of figures was provided; and the index was expanded. Information contained in the eleventh edition, like that in previous editions, represents the single most-varied compendium of statistics about Mississippi to be found anywhere. It is used by researchers, administrators, planners, historians, educators, politicians, and a host of others who maintain an interest in Mississippi and its areas. Copies of earlier editions have been distributed in virtually every state in the Union and in a number of foreign countries.

Comments and suggestions for improvement of its contents and the manner in which they are presented are earnestly solicited. Just address your response to The Editor, *Mississippi Statistical Abstract.* Post Office Box 5288, Mississippi State, Mississippi 39762.

1.0 RECREATION, GEOGRAPHY, AND CLIMATE

United States Bureau of the Census publications, *County and City Data Book* and the *Statistical Abstract of the United States*, provide data concerning land areas and park and recreation areas for Mississippi.

The U.S. Department of Commerce, Environmental Science Services Administration, along with the *Mississippi Annual Weather-Crop Summary* published by the Mississippi Crop and Livestock Reporting Service, publish weather and climatological information. The normal values of weather conditions are based on records for the 30 year period 1931-1960, with adjustments being made in those instances where continuous records for 30 years are not available from the same instrument site.

Data on air and water pollution have not been collected by the Mississippi Advisory Council on Water Pollution Control to date and cannot be included.

The Mississippi State Game and Fish Commission provided previously unpublished data concerning hunting and fishing and the Mississippi Boat and Water Safety Commission provided data regarding registered boats by district.

Additional information regarding the climate of this State may be obtained by writing to the National Climatic Center, Federal Building, Asheville, N.C. 28801, or to any Weather Service Office near you. Additional precipitation data are contained in the "HOURLY PRECIPITATION DATA" for this State.

DIMENSIONAL UNITS: Unless otherwise indicated, dimensional units used in this table are: Temperature in °F, precipitation and evaporation in inches. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

OBSERVATION TIME: The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground is at observation time for all except Weather Service Offices and FAA stations. For these stations snow on ground values are at 6:00 a.m., c.s.t.

SNOWFALL: Entries of snowfall in the table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1941-1970.

DIVISIONS, as used in this table, became effective with data for January 1953.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

IN THE TABLE THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

	No record in the "Monthly Summarized Data" table is indicated by no entry.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
‡	Extreme occurred at station with incomplete data which may have been exceeded.
B	Adjusted to a full month.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Stations appearing in the table with no data were either missing or received too late to be included in this table.

2.0: POPULATION

The most authoritative source of population statistics is the Bureau of the Census, U. S. Department of Commerce. This agency provides statistics concerning distribution, characteristics, and decennial changes of the population for states and areas. A highly detailed study of the United States population has been undertaken every ten years since 1790 and is available in various Census publications. The 1970 census was conducted primarily through selfenumeration; this technique was first introduced on a nationwide scale in 1960 as a substitute for the traditional direct interview. The questionnaire was mailed to persons in metropolitan areas and adjacent counties, representing approximately three-fifths of the total population in the United States. These persons were requested to mail their responses to the Census Bureau on Census Day. The remaining two-fifths of the population were called upon by an enumerator on Census Day to gain their responses.

Any mass statistical exercise, such as a census, is subject to errors which may arise during the collection or the processing phase; therefore, the data is analyzed for these errors before it is released. Data in this edition of the *Abstract* represents that which is available at this time - - future issues will contain more extensive census information.

Dating back to the 1790 custom, each person was enumerated as an inhabitant at his usual place of living and sleeping which may not have been his legal or voting residence. Urban population consists of persons living in places of 2,500 inhabitants or more incorporated as cities, villages, boroughs, or towns and excludes those living in rural areas of extended cities, those in unincorporated places of 2,500 inhabitants or more, and other territory included in urbanized areas. All other inhabitants constitute the rural population. The concept of race used by the Census Bureau is not based on biological stock, but rather reflects self-identification by the respondents.

Annual population data for Mississippi is found in the *United States Statistical Abstract;* estimates and migration data are available from publications of the Sociology Department of Mississippi State University.

3.0: HEALTH AND VITAL STATISTICS

The Statistical Services Division of the Mississippi State Board of Health has provided a wealth of data concerning births and deaths, marriages and divorces, and health matters.

Occurrence data were obtained from certificates filed in Mississippi at the place of the event. Residence data includes transcripts of records of events that occurred in other states which involved Mississippi residents and excludes records filed in Mississippi which involved nonresidents.

Hospital data comes from both the State Board of Health and the Mississippi Commission on Hospital Care.

4.0: EDUCATION

The bulk of the data regarding Mississippi public education has been taken from *Statistical Data,* published by the Mississippi State Department of Education. Because private schools are playing an increasing role in the fabric of elementary and secondary education, available data regarding these indicators are also included.

Expenditures and receipts are published in the *Annual Report of the State Superintendent of Public Education* which also supplied information concerning teacher's salaries.

Comparative data for surrounding states have been taken from the *Statistical Abstract of the United States,* a Department of Commerce publication.

5.0: LABOR FORCE, EMPLOYMENT, AND EARNINGS

Labor force statistics for Mississippi are published monthly by the Mississippi Employment Security Commission in *Mississippi Labor Market, Monthly Review of Current Labor.* Annual data are found in the *Annual Supplement* to this publication which is published in March of each year.

Unemployed persons comprise all persons not working during the survey week who have made specific efforts to find a job within the past 4 weeks and who were available for work, and persons who were on layoff from a job or waiting to report to a new wage or salary job within 30 days.

The bulk of employment data is found in Mississippi Covered Employment and Wages, published both quarterly and annually by the Mississippi Employment Security Commission. The employment and wages figures cover all full-time and part-time employees who were employed for the pay period which includes the twelfth of the month; consequently workers who were employed by more than one establishment during the period are counted more than once. Certain groups, notably agricultural workers, domestic servants in private homes, railroad employees, casual labor not in the usual course of an employing unit's trade or business and employees of religious or charitable institutions are not covered under the Mississippi Law.

Because of data complications, two tables have been omitted from the 1979 Abstract. These tables are: (1) Number of Reporting Units and Monthly Employment of Workers Covered Under the Mississippi Employment Security Law, By Industry Division and By Industry Group for the Calendar Year 1978; and (2) Average Monthly Employment, Total Quarterly and Total Annual Wages, and Average Annual and Average Weekly Wage of Workers Covered Under the Mississippi Employment Security Law, By Industry Division and By Industry Group for the Calendar Year 1978. If this data is needed, it can be found in *Mississippi Covered Employment and Wages* 1978. Inclusion of these tables will be resumed in the 1980 Abstract.

Income data comes from the Bureau of Economic Analysis, Washington, D. C.

[1] Data covers 184,300 full and part-time production workers in manufacturing, 4,000 non-supervisory employees in electric utilities, and 9,600 in banking who worked during or received pay for the payroll period including the 12th of the month. The average earnings are "Gross," that is, they reflect not only changes in basic hourly and incentive wage rates, but also such factors as premium pay for overtime work and shift differentials. The workweek information relates to average hours worked or paid for and is somewhat different from scheduled hours because of such factors as absenteeism, labor turnover, part-time work, overtime work and stoppages. These series are prepared by the Mississippi Employment Security Commission in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

[3] This is a drop in annual needs, as published in the 1970-1980 *Occupational Needs in Mississippi*, of about 3,500. This decline was mainly due to an update in the replacement ratios. Changes in the labor force composition (more women), lower mortality rates, later retirements, etc., all contributed to less replacement needs

6.0: MANUFACTURING AND TRADE

Sales tax collections indicate that sales by industry group for the State of Mississippi have increased significantly in recent years, according to Figure 6.1. Employment figures are found in *County Business Patterns, Mississippi.* Principal industries for the state are found in the *Editor and Publisher Market Guide.* The major source for data on new and expanded industries was the *Mississippi Business Review,* a publication of the Division of Business Research, Mississippi State University. The Mississippi Agricultural and Industrial Board supplied additional information concerning new and expanded industries.

Business births and deaths for enterprises covered by the Mississippi Employment Security Law are published by the Mississippi Employment Security Commission in *Mississippi Business Population, Births, Deaths, and Changes in Ownership.*

The annual *Service Bulletin* of the Mississippi State Tax Commission provides valuable data concerning trade for industry groups as well as municipalities and counties in the state.

7.0: TRANSPORTATION

Highway system information was obtained primarily from the Federal Highway Administration's publication *Highway Statistics,* for comparative states while Mississippi data came from *Mississippi Statistics For Highway Planning,* published by the Traffic and Planning Division of the Mississippi State Highway Department.

Construction, revenue, and disbursement information for Mississippi is also found in the latter of the above volumes.

License tag and motor vehicle registration data came from the above publications as well as from *Annual Reports* of the Mississippi Motor Vehicle Comptroller and the *Mississippi Business Review*, a publication of the Division of Research, College of Business and Industry, Mississippi State University.

8.0: COMMUNICATIONS AND PUBLIC UTILITIES

Much of the basic data concerning the communications industry in Mississippi can be found in directories which are prepared for each segment of the Industry. For example, newspaper data were found in a directory entitled *Mississippi News Media* published by South Central Bell, the *Directory of Post Offices* yielded data for post offices, and telephone data were found in unpublished reports from the South Central Bell Telephone Company. Gas and electric data pertaining to the production and consumption of these energy sources came from the *Statistical Year Book of the Electric Utility Industry.*

Other general statistics concerning these data which do not appear in this publication may be found in the *U. S. Statistical Abstract* which is published annually by the U. S. Department of Commerce.

9.0: BANKING, FINANCE, AND INSURANCE

The *Annual Report* of the Department of Bank Supervision, State of Mississippi, provides additions to the time series data of deposits for both State and National Banks in Mississippi. Other detailed banking information is found in publications of the Federal Deposit Insurance Corporation such as *Assets, Liabilities, and Capital Accounts—Commercial and Mutual Savings Banks* and *Summary of Accounts and Deposits in All Commercial Banks, National Summary.*

The *Southern Bankers Directory* and the *Mississippi Banker* are additional sources of data. Unpublished data from the Department of Bank Supervision complete the banking series in this volume of the *Abstract.*

Savings and loan information concerning the number of associations and their assets comes from the *Savings and Loan Fact Book.*

The *Life Insurance Fact Book* is the source for series and comparative data of insurance activities in Mississippi and selected states. The Insurance Department of the State of Mississippi supplied unpublished data which completed this category.

[1] Adjusted to December 31, 1977. In assumption cases, number of depositors refers to number of deposit accounts.

[2] Excludes $1,134 thousand of nonrecoverable insurance expenses in cases that were resolved without payment of claims or a disbursement to faciliate assumption of deposits by another insured bank and other expenses of field liquidation employees not chargeable to liquidation activities.

[3] Includes estimated additional disbursements in active cases.

TABLE 9.12 (cont'd.)

---

[4] Excludes excess collections turned over to banks as additional purchase price at termination of liquidation.

[5] These disbursements are not recoverable by the Corporation; they consist almost wholly of field payoff expenses.

[6] Includes advances to protect assets and liquidation expenses of $99,845 thousand, all of which have been fully recovered by the Corporation, and $8,704 thousand of non-recoverable expenses.

[7] No cases in 1962 required disbursements. Disbursement totals for each year relate to cases occurring during that year, including disbursements made in subsequent years.

[8] In 1977 the assets of Banco Economias were purchased outright by the Corporation. Disbursements in the case are included in table 125 under "Other disbursements" and are not included in this table.

NOTE: Due to rounding differences, components may not add to totals.

10.0: LAW ENFORCEMENT, COURTS, AND CRIME

Comparative state data are found in the *Uniform Crime Reports* as published by the Federal Bureau of Investigation. Crime rates are shown by number and type in this series.

Statistics on motor vehicle accidents are found in the *Annual Summary* of the Statistical Bureau of the Mississippi Highway Safety Patrol, as well as in unpublished data from that group.

Mississippi Youth Court Statistics show the occurrence of children's cases in the courts, as well as the types of cases handled in which children were involved.

The number of courts reporting to the Department of Public Welfare affects the total children's cases and consequently the comparability from year to year of youth court statistics. Courts from only four counties (Bolivar, Hinds, Pike, and Warren) have reported one or more cases for each year from 1946 through 1972. The size of the courts not reporting also influences the total cases. In 1957 and 1958 one of the most active courts in the state made no report.

Because of many limitations the trend table does not show the extent of delinquency or neglect in this state and may be particularly misleading if only total number of cases is used to make comparisons between years. The table is included, however, to show the increase in the total number of courts reporting youth court statistics to the Department of Public Welfare.

[1] Prior to 1972 this column was entitled "Larceny - $50 and over," the total crime index and the rate for larceny-theft are not comparable with prior years because of the inclusion of theft under $50 for years after 1971.

NOTE: An average minimum flow cannot be computed for the Yazoo River because of water control by the four large reservoirs located within this area. The median flow was computed for natural conditions prior to the initial operation of these reservoirs.

11.0: FOREST AND MINERAL PRODUCTS

Data concerning Mississippi Forest Resources are taken from Mississippi State Tax Commission Annual Report of the Timber Severance Tax Division, the Mississippi Forestry Association Ad Valorem Tax Division, and the Mississippi Employment Security Commission.

The principal source of mineral data for Mississippi is the Mineral Industry of Mississippi Bulletin published by the Mississippi Geological, Economic and Topographical Survey. Petroleum product data is found primarily in the Oil and Gas Bulletin published by the Mississippi Oil and Gas Board and Energy Data Reports published by the United States Department of the Interior, Bureau of the Mines.

12.0: PUBLIC FINANCE AND TAX REVENUE

The Annual Report of the State Auditor of Public Accounts provides a detailed account of Mississippi's State Government financial activities. A detailed accounting of all monies received, by source of revenue, and all expenditures, by recipient, for all activities of government are covered in this fiscal based publication.

Tax data can be found in the Mississippi State Tax Commission's *Service Bulletin* which is published on a fiscal basis.

Additional public finance information can be found in publications of the Mississippi Economic Council, the State Alcoholic Beverage Control Division of the State Tax Commission, and from the Department of Bank Supervision, State of Mississippi.

13.0: SOCIAL INSURANCE AND WELFARE SERVICES

The Mississippi State Department of Public Welfare's *Annual Report* is a detailed source of information concerning public assistance programs available to Mississippi residents. Data covers all categories of assistance by county.

Unemployment data comes from the Mississippi Employment Commission's *Twenty-First* and *Twenty-Second Reports* for fiscal 1971 and 1972 respectively. Additional unemployment data is gathered from the U. S. Department of Labor.

15.0: CONSTRUCTION AND HOUSING

The U.S. Department of Commerce *Construction Review*, published monthly, was the principal source of construction data. Information concerning mortgage loans was obtained from unpublished data from the Federal Home Loan Bank of Little Rock, Arkansas.

The *1970 Census of Housing* provided information concerning housing characteristics for areas and places as well as some data based on race.

Because of the lack of municipalities which require building and construction permits, housing data are difficult to obtain for Mississippi. Other sources of potential data have also failed to yield adequate information.

16.0: AGRICULTURE

The United States Department of Agriculture is the leading source of agricultural statistics for the nation. *Agricultural Statistics,* their annual publication, is a comprehensive source of data on agricultural production, supplies, consumption, facilities, costs, and returns.

The *Census of Agriculture* reveals characteristics of farms and operators in approximately five year intervals. The *Census* is also a publication of the USDA.

The Mississippi Crop and Livestock Reporting Service provided the bulk of the Mississippi data for current state agricultural activities, partially from their *Mississippi Farm Report* and *Chicken and Egg Facts,* both published bi-monthly, along with numerous periodic papers and summary sheets. This organization also publishes *Mississippi Agricultural Statistics* on a biennial basis.

Dairy information comes from the Mississippi Cooperative Extension Service at Mississippi State University.

A number of additional detailed publications pertaining to agricultural activities are published by the USDA and may be of interest. These include *Farm Income, State Estimates; Farm Labor Release; Crop Production, Annual Summary;* and various special crop summaries.
